VRChat Intro

Hi, We're VRChat!

Welcome to the team. You're joining a diverse, fully remote group of movers and shakers. Here's a TL;DR on where we've been so far.

We were founded in 2014... Graham Gaylor and Jesse Joudrey launched our company a decade ago.

...But the app went live on Steam in 2017. Our users are both desktop fans who play the app on their traditional gaming PC, and VR users who jump onto VRChat via their headset of choice.

Our official headquarters address is in San Francisco. But nobody works out of the office! Your teammates are spread

across time zones, continents and countries. We're all just one world hop away.

“ Our monthly regional team hangouts are such a fun way to connect with people I know well in VR, but in person.”

-ShinyPanther

Who Can I Reach Out To For Help?

You'll have a dedicated onboarding buddy, assigned to you on your first day, who can help answer questions. For specific help, we have point people to help you put out the fires when everything is *fine*. Flick through these slides to learn more about our helpers.

Norm 1

Linda Lochrie

Linda is our HR manager, and can answer all your questions about benefits and government paperwork.

Norm 2

Lisa (Amishsunshine)

Lisa is our knowledge manager and general documentarian. If you have a question about where information lives or who to contact to get an answer, start with her.

Norm 3

Tupper

Tupper is our head of community, and a good place to start for questions about communications, marketing, or anything related to how we talk to our users.

Norm 4

Aev

Aev is head of production, the team that serves as VRChat's project management. Each team has its own producer. Aev can help point you towards who your producer is, and which producer will know the answer to your questions about product and personal responsibility.

Remember, we're building something incredible,
but everything we do is enabled by the people who
build it.

What We Do

LD lisa dellaporta

Limitless Experiences

VRChat offers an endless collection of social VR experiences by giving the power of creation to its community. Anyone can build a world or avatar in VRChat, for all to experience or wear.

A production team meeting in VRChat

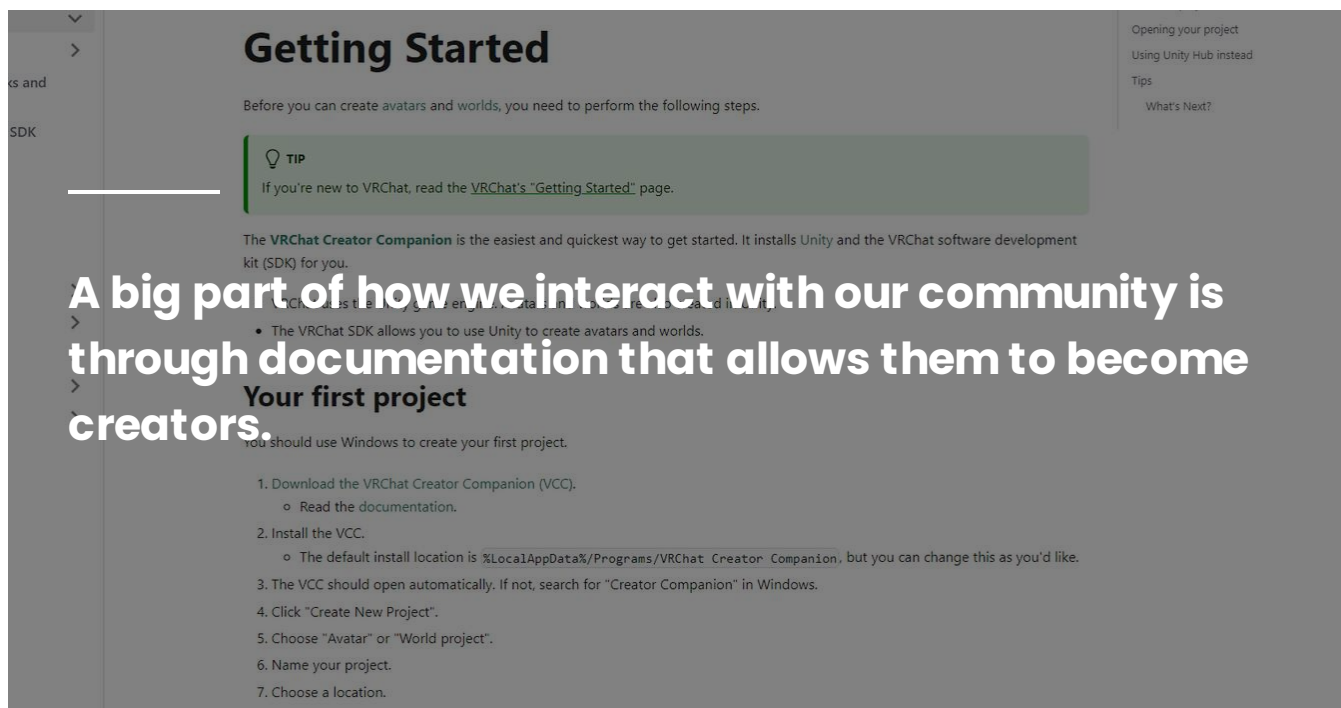

Worlds can be as simple as flat hangout spaces or as complex as interactive experiences, with objects you can pick up, eat, ride, or use.

Avatars are digital expressions of identity. Users try on avatars made by others (including us), or make and upload their own.

The SDK Magic

Once users download our software development kit (SDK), they can make their own worlds, upload them for approval from the VRChat team, and become **creators** ✨. Not all users are creators, but our creator community is forever growing, and a huge part of what makes VRChat special.

Creator Community

Use the button to open up a new tab and take a brief tour of our creator community, hosted by your new coworker Fax.

CREATOR DOCS

Company Culture

LD lisa dellaporta

Because you can be anyone in VRChat, you can be
anyone *at* VRChat.

Who doesn't love a good emoji shower?

Our Company Culture

We believe in empowering you to do your best work by allowing you to be your true self.

Camera on? Your Choice

Many of your coworkers choose to have their camera off for meetings, or to join meetings with their avatar in place instead of their real face. That's fine with us, and you should feel free to present however you most feel comfortable.

Every Voice Matters

We believe in open discussion about the product we build. You'll be invited to team meetings throughout the year where you can voice your requests or concerns, directly to management.

Explore and Create

Twice a year, we pause work for a week to engage in company-wide hackathons called *Jams*. If it relates to VRChat at all, you can use the time to play, experiment, and celebrate your achievements (including failures).

Work/Life Balance

We trust you to get your work done. List your working hours for your team, but take your breaks to go pick up your kids, take a walk, or go to the doctor. We also have twice weekly team hangouts, the virtual equivalent of an afternoon coffee break.

Product Perks

All employees have the option to upgrade to VRChat+ free of charge as part of their employment...for life. Expect complementary swag to be shipped to your door, too, whenever we do new merch drops.

Continuing Growth

Want to learn how to use Blender or Unity? All our teammates are invited to take advantage of our detailed coursework with our partners. Talk to your manager about clearing time on your calendar for your own learning.

"VRChat is more than just a workplace. It's a community."

- BreadTop

Next up, let's talk about your onboarding.

Onboarding

LD lisa dellaporta

Getting Started

The majority of your onboarding will take place in other apps. Scroll down to read about the tools we use, and why we use them.

Confluence

Knowledgebase

Confluence is our internal wiki. Here you'll find your onboarding checklists, assigned to your personal space, as well as documentation about all internal things VRChat. Jira-haters fear not: we only use this side of Atlassian, not their task management products 🚫.

GitHub

Repository and Git Host

Many employees will have access to our internal GitHub, which contains our auto-generated developer docs in addition to our codebase.

Linear

Project Management Tracking

VRChat uses Linear for our internal task tracking across all teams. You'll use this every day to see what your to-do list looks like, and to assign tasks to others.

Rippling

HRIS

If you're a full or part time employee, Rippling will handle your benefits administration, paystubs, personal address and info changes, and time off requests.

Google Suite

Email, Spreadsheets, Calendar, Slides, Drafting Docs

We're a Google shop. Use it for anything you'd use Microsoft Office for, but laugh while you do it.

DEEL

Non-US Employee HRIS

Deel manages our contractor payments and tax info for all non-US employees.

deel.

You're doing great! Next let's meet some furry friends.

CONTINUE

Cat? Rat? Why?!

Your Mascots

VRChat has a public mascot called **VRCat**. He shows up on our website and promo materials regularly.

However.

We also have a secondary mascot named **VRRat**, who has only recently begun to make his way out into the public world. You'll notice that internally, we tend to use rat more than cat.

VRRat is your agent of chaos.

Embrace him at your own peril.

Questions About Using Our Mascots In Your Work?

Reach out to our comms team to see what you can and can't use cat and rat for in world and avatar creation.

Product Pre-Check

lisa dellaporta

Don't panic! This isn't a real quiz. We hire both experienced and newb VRChat users. Complete this little activity to let us know where you fall on the user spectrum. Your results have no impact on your job or how you're viewed by the team, but they *do* help us know what onboarding materials to send your way.

Question

01/06

What best describes an instance of a world?

-
- ☐ They're the same thing
 - ☐ An instance is a parallel version of a world
 - ☐ A world is a parallel version of an instance
